

Standards Help the Fight Against

COVID-19

Face Masks

Penetration Resistance,
Filtration Efficiency
(Tests and more,
including F2100)

Respirators

Protection
(Practice F3387)

ASTM International
Standards Support
PPE Effectiveness

Gloves

Rubber, PVC, Nitrile
(Specifications,
including D6319)

Medical/Surgical Gowns

Pathogen Resistance,
Tear Strength,
Vapor Transmission
(Tests and Specification F2407)

Hand Sanitizers

Bacteria Elimination,
Effectiveness
(Tests E2755 and more)

Thermometer Covers

(Specification E1104)

The committees responsible for the current no-cost standards are:

Rubber and Rubber-Like Materials (D11) • Textiles (D13)
Pesticides, Antimicrobials, and Alternative Control Agents (E35)
Primary Barrier Packaging (F02) • Medical and Surgical Materials and Devices (F04)
