DENTAL INFECTION CONTROL
AWARENESS MONTH

HOW-TO GUIDE FOR DENTAL INFECTION CONTROL AWARENESS MONTH (#DICAM22)

1. Adopt the OSAP/CareQuest Institute Best Practices for Infection Control in Dental Clinics During the COVID-19 Pandemic document.

This living document has the latest guidance and regulations.

2. Champion the Infection Control Coordinator.

Every dental practice needs at least one assigned Infection Control Coordinator (ICC). Download the #DICAM22 toolkit to learn more about the ICC role, responsibilities, and available resources.

3. Build patient trust by using campaign materials focusing on hand hygiene, instrument sterilization, dental water quality, and patient eye protection.

We've created posters, letters, scripts, and more for you to use.

4. Join OSAP and demonstrate your commitment to infection prevention and control education.

- Learn about OSAP's [member benefits](#)
- Find timely, unbiased, evidence-based [education and training](#)
 - OSAP Dental Infection Control Boot Camp (January 23 -25, 2023)
 - OSAP Annual Conference (June 1 – 3, 2023)
- Explore [resources](#) to help solve infection control challenges.
- Increase your knowledge and boost your credibility by earning the [OSAP-DALE Foundation Dental Infection Prevention and Control Certificate™](#)
- Demonstrate your competence in dental infection control and your commitment to dental safety by earning certification
 - [Dental Industry Specialist in Infection Prevention and Control® \(DISIPC®\)](#)
 - [Certified in Dental Infection Prevention and Control®\(CDIPC®\)](#)
