September 7, 2023 (ATLANTA) — The Organization for Safety, Asepsis and Prevention (OSAP) announces that registration is now open for the 2024 OSAP Dental Infection Control Boot Camp™. Two registration formats are available: In-Person Plus and On-Demand Only.

Boot Camp provides a comprehensive introduction to the essential principles and practices of infection prevention and safety within the dental setting. The course is perfect for those new to dental infection prevention and safety, those early in their career, making a career shift, or who want a refresher. By the end of the course, participants will have a strong foundation, empowering them to create a safe environment for both patients and providers.

Boot Camp will take place in Atlanta, GA, at the Crowne Plaza Atlanta Perimeter at Ravinia from February 5 – 7. Sessions will be recorded and available to all registered participants starting February 26. Those who are unable to join in Atlanta can select the On-Demand Only option and receive access to the session recordings for 60 days starting February 26. OSAP will also bring back their successful Antibiotic Stewardship Summit pre-course event on February 4 and a special Federal Service Session on February 8.

“We encourage everyone in the oral healthcare community to join us at the 2024 OSAP Boot Camp,” says OSAP Executive Director Michelle Lee, CPC. “Ensuring a safe dental visit is a team effort. Everyone from the dental assistant to the dental hygienist to the dental practice manager to the dentist is involved. And so are the educators, consultants, and sales representatives who sell dental infection control products and services. Participating in Boot Camp will ensure you and your team understand relevant regulations, guidelines, standards, and best practices to protect yourselves and provide safe care to every patient.”

Participation counts toward the education requirements for two dental infection prevention and control certifications:

- [Dental Industry Specialist in Infection Prevention and Control® \(DISIPC®\)](#)
- [Certified in Dental Infection Prevention and Control® \(CDIPC®\)](#)

Early-bird registration is available now through December 4 at osapbootcamp.org.

About OSAP

The Organization for Safety, Asepsis and Prevention (OSAP) is the only nonprofit membership association for oral healthcare professionals that focuses exclusively on infection prevention and patient and provider safety. OSAP's mission is to be the leading provider of infection prevention and control education, training, and credentialing that supports safe dental visits. For additional information, visit www.osap.org.
